

NOOR BIBI

AI/ML Engineer | Full-Stack Developer | Mobile Application Developer

Phone: +92 328 4742501 | Email: noorbibi803@gmail.com | Address: Lahore, Pakistan

www.linkedin.com/in/noor-bibi-a75263282

SUMMARY

AI/ML Engineer and Full-Stack Developer designing intelligent applications, scalable backend systems, and cross-platform mobile solutions. Proficient in machine learning, Retrieval-Augmented Generation (RAG), large language model integration, and computer vision using modern AI frameworks and cloud technologies. Experienced in developing Flutter applications, RESTful APIs, containerized microservices, and automated CI/CD pipelines. Demonstrated success delivering freelance software projects, leading university technology initiatives, mentoring students, and building production-ready solutions.

AREAS OF EXPERTISE

- **AI & Machine Learning:** Machine Learning | Natural Language Processing (NLP) | Computer Vision | Retrieval-Augmented
- **Software Development:** Python | Flutter | Dart | React.js | Next.js | FastAPI | Flask | Django | Node.js | Express.js | RESTful API
- **Databases & Cloud:** PostgreSQL | MySQL | MongoDB | ChromaDB | SQLAlchemy | Vector Databases | (GCP) | Microsoft Azure
- **DevOps & Engineering:** Docker | Kubernetes | GitHub Actions | CI/CD Pipelines | Git/GitHub | Linux | Nginx | Agile/Scrum
- **Web & Security:** JavaScript | TypeScript | HTML5 | CSS3 | Tailwind CSS | Firebase | OAuth 2.0 | JWT Authentication

EDUCATION

Bachelor of Science (BS) in Computer Science

Sep 2022 - June 2026

Beaconhouse National University (BNU), Lahore, Pakistan

Relevant Coursework:

Artificial Intelligence | Machine Learning | Database Management Systems | Advanced Database Management

EXPERIENCES

Instructor

Jul 2025 – Present

RISE – Resilient Innovators for Skill-building & Elevation, Lahore, Pakistan

- Designed and delivered lessons in digital skills and problem-solving, mentoring students to build creativity and confidence through interactive, project-based learning for local and international students.
- Facilitated hands-on, lab-style practice sessions that translated technical concepts into structured, beginner-friendly exercises.
- Developed supplementary learning materials and assessments to track student progress and improve engagement.

Teaching Assistant – DBMS, ADBMS & Artificial Intelligence

Sept 2024 – May 2025

Beaconhouse National University (BNU), Lahore, Pakistan

- Conducted tutorials covering databases, SQL, and artificial intelligence concepts for undergraduate students effectively.
- Assisted in grading coursework while mentoring over 60 students through practical laboratory sessions successfully.

President – BNU SciTech Society

May 2025 – June 2026

Beaconhouse National University (BNU), Lahore, Pakistan

- Led the technology society, organizing workshops, hackathons, seminars, and industry networking events successfully.

PROJECTS

MedAssist – RAG-Powered Clinical Knowledge Assistant - [GitHub Link](#)

2026

- Developed a RAG-powered clinical knowledge assistant delivering accurate, evidence-based medical responses using retrieval.
- Implemented dual-layer hallucination mitigation combining retrieval filtering with intelligent LLM relevance validation.
- Achieved 100% evaluation accuracy across 25 clinical questions spanning five medical categories.

Atelier – AI-Based Personal Styling Application

Jun 2025 – May 2026

- Developed a Flutter application generating personalized styling recommendations using computer vision classification models.
- Trained a twelve-season machine learning model accurately identifying personalized color palettes from user selfies.
- Designed a FastAPI backend supporting wardrobe management, outfit planning, and personalized fashion recommendations.

DevOpsFlow – Containerized CI/CD Platform - [GitHub Link](#)

2026

- Architected a scalable three-tier microservices platform using React, Express, PostgreSQL, Docker, and Kubernetes.
- Automated CI/CD pipeline integrating testing, vulnerability scanning, containerization, and deployment through GitHub Actions.
- Implemented secure, cloud-native deployment workflows that improved application reliability, scalability, and software delivery.

CERTIFICATIONS

- **Ethical Hacking Fundamentals** – LearnKartS
- **APAC Solution Challenge** – GDGoC Beaconhouse National University
- **SOFTEC** – FAST National University of Computer & Emerging Sciences
